

Internship / Working Student weed management field trials (m/f/d)

Agriculture is all about balance. The balance that is crucial to everyone's existence - also applies to our Agricultural Solutions division. We connect innovative thinking with practical action to find the right balance for success - for farmers, agriculture and future generations. With seeds and traits, crop protection and digital solutions, we help farmers produce food more efficiently, protect the land and meet the needs of society.

RESPONSIBILITIES

During your internship/working student opportunity with a duration of 3 months, you will become acquainted with several tasks within our Crop Protection unit, giving you the chance to apply your theoretical knowledge in the daily business. BASF xarvio Digital Farming is one of the world's leading groups in delivering digital agricultural solutions.

- o You will support an agronomic field trial and help with data collection in the area of sustainable weed management with the help of an autonomous robot.
- o The trial is located near Mannheim in the period of Feb 16th - May 15th and with the expected workload of 15-20 hours per week.
- o After the end of the field trial, for outstanding students there might be an opportunity to extend the collaboration to a Master's thesis within the Data Science team based in Cologne, Germany.

BENEFITS

- o Responsibility from day one in a "real-world" scenario and on the job training in a committed team
- o Interacting with multiple stakeholders including the data scientists, farm leaders and technicians
- o Support of all employees by using different measures to ensure the balance of professional and private life
- o Competitive compensation including attractive benefits as well as excellent career opportunities in an international company
- o Information regarding internships: on.basf.com/internship
