Your Responsibilities

- As a Working Student Supply Chain Management (SCM), you will be involved in the analysis, planning and optimization of the Europe-wide supply chain of medical demonstration devices
- You will support the development of project objectives and the creation of project templates, while coordinating, supporting and implementing projects and communicating with internal/external stakeholders
- You will support the planning of projects with regard to project organization, resources, scheduling and risk assessment, among others
- In addition, you will work on identifying bottlenecks and inefficiencies and take on the derivation and implementation of measures for improvement

Your Qualifications

- You study Business Administration, Engineering, Logistics or a comparable course of study
- You have first professional experience in project management, preferably in supply chain, logistics, IT and/or production
- You handle Microsoft Office applications with ease (especially Excel and PowerPoint)
- You have very good written and spoken communication and English skills
- Your strengths include strong analytical, planning and coordination skills
- You have a hands-on can-do attitude
- You are open-minded and have demonstrated a strong team spirit
- You enjoy an independent, reliable and result-oriented way of working

Your Benefits

- 17 Euro per hour
- Proportionate vacation entitlement
- Interesting and diverse tasks in an international working environment
- Excellent mentoring structure with regular feedback
- Up to 60% remote work possible
