

Dionex Softron GmbH

Intern (m/f): Junior Analyst Internship (Mandatory)

Thermo Fisher Scientific Inc. (NYSE: TMO) is the world leader in serving science, with revenues of \$17 billion and 50,000 employees in 50 countries. Our mission is to enable our customers to make the world healthier, cleaner and safer.

Dionex Softron GmbH is part of Thermo Fisher Scientific. We develop and produce products for liquid chromatography, as well as data systems for instrument control, data acquisition and evaluation, and data reporting. Located in Germering, Germany, Dionex Softron is a fast-growing and innovative research and development site. Over the past 10 years, the number of our staff has tripled and includes many mathematicians, physicians, chemists, engineers and computer scientists. All our employees contribute to our company's success and growth.

To do:

The internship position is within the Financial Planning & Analysis (FP&A) Department of a strategic business unit in Thermo Fisher Scientific. The intern will be involved in multiple areas giving her/him the opportunity to learn & contribute to key FP&A activities of an international global player. More specifically she/he will be a fully empowered member of the team with regards to business reporting, variance analysis, forecasting, as well as project activities. The intern will be given the opportunity to present results of activities assigned to senior management including the VP/GM and Finance Director of the business. This is an excellent opportunity to gain working experience in a global environment, covering different FP&A processes across the liquid chromatography product line in Thermo Fischer Scientific.

Roles & responsibilities:

- As part of the FP&A organization, assist in a large variety of analytics & reporting activities by partnering closely with the FP&A Manager
- Drive analytics to explain variances compared to prior year & plan in full responsibility of area assigned. This involves the use of MS Navision & SAP.
- Engage with regional finance & operations managers to drive transparency & identification of improvement areas
- Support the FP&A team with regular tasks, ad hoc requests and simplification projects
- Participate in the implementation of several business intelligence improvements

Required skills:

- Undergraduate student requiring internship according to her/his university curriculum
- Strong analytical & problem-solving skills
- Good command of fundamental finance & accounting concepts
- Process driven thinking & passion for simplification
- Self-starter, independent with strong intellectual curiosity
- Hands-on mentality
- Advanced command of MS Excel, knowledge of MS Navision & SAP a plus
- Good command of English
- German work permit

Gains:

- Internship with an innovative, growth-oriented organization
- Balanced scope with both routine and project activities
- Responsibility for own area including presentation of outcomes
- Intensive coaching & feedback culture
- Exposure to senior leadership team
- Outstanding career and development prospects
- Exciting company culture which stands for integrity, intensity, involvement and innovation
